

# Course Syllabus – Scaffold User Orientation

## **Audience**

Persons working from scaffolds

## **Presentation Method**

CBT – Computer Based Training

## **Training Duration**

Student paced – Approximately 30 minutes

## **Course Summary**

Training will inform trainees of the nature of hazards when working from scaffolds, types of fall protection, the proper use and handling of materials, load-carrying capacities of scaffolds, and pre-use inspections. This course will also address the industry best practice of a scaffold tagging system.

## **Subject Matter**

- ❖ Types of Scaffolds
- ❖ Basic Elements
- ❖ Electrical Hazards
- ❖ Fall Hazards
- ❖ Guardrails & Safety Net Systems
- ❖ Personal Fall Arrest Systems
- ❖ Material Handling Safety
- ❖ Scaffold Loads
- ❖ Scaffold Inspection
- ❖ Scaffold Tagging System

## **Objectives**

Upon completion of training, employees will be knowledgeable of:

1. Identifying a scaffold that is safe to work from
2. Pre-use scaffold user level inspection requirements
3. Safely accessing scaffolds and hoisting materials
4. Identifying required fall protection when working from scaffolds
5. Reading scaffold tags

## **Measurement Device**

Test – 25 questions, 70% to pass
