

CONTRACTOR SAFETY ORIENTATION SYLLABUS

Bloodborne Pathogens for Non-Health Care Workers

AUDIENCE

- ❖ *All contractor employees*

PRESENTATION METHOD

- ❖ *Instructional Lecture – PowerPoint Presentation - Video*

TRAINING DURATION

- ❖ *120 Minutes*

PURPOSE

- ❖ *Training will inform personnel of the hazards associated with Bloodborne Pathogens, its exposure effects and methods to prevent exposures. The course will inform employees of the safety procedures and rules when there is a risk of contamination with Bloodborne Pathogens.*

SUBJECT MATTER

- | | |
|--|------------------------------------|
| * OSHA Bloodborne Pathogens Standard | * Immunization |
| * Bloodborne Pathogens (HBV, HIV & Syphilis) | * Maintenance & Janitorial Service |
| * Transmission | * Laundry |
| * Personal Protective Equipment | * Washing Hands |
| * Universal Precautions | * Post Exposure Reporting |
| | * Exposure Control Plan |

OBJECTIVES

- ❖ *At the conclusion of this training program each participant should:*
1. Know how often personnel are to be trained about OSHA Bloodborne Pathogens Standard.
 2. Know what Bloodborne Pathogens are and how a person is exposed.
 3. Know the health hazards associated with Bloodborne Pathogens.
 4. Know how engineering controls can assist in safety in the work place.
 5. Know the need to use personal protective equipment (PPE).
 6. Understand the safety procedures to use when an emergency occurs so as to avoid Bloodborne Pathogens.
 7. Know how to properly clean up blood, using PPE and properly disposing of the biohazard material.
 8. Understand the danger of Bloodborne Pathogens when doing routine cleaning/laundry and the need to use protective measures.
 9. Know the policy for employee records.
 10. Understand emergency procedures.

MEASUREMENT DEVICE

- ❖ *Written Test – 24 questions, 70% to pass*
